

# Modern Self-services BI & Analytics Platform

*(AI Powered)*

Transform data into insights and actions in minutes

[www.conrior.de](http://www.conrior.de)

## Data Preparation & Management

Get your data analyzed, wherever it is, from over 300+ data sources. Also cleanse, transform, and enrich the raw data with AI-powered data preparation capabilities for high data veracity.

## Visualization & Analysis

Cross-functional data analysis in real time can be done by using 50+ chart types. Dynamic charts and dashboards can be created through our drag-and-drop based visualization builder.

## AI Infused Analytics

AI-augmented capabilities like conversational analytics, automated insights, and generative AI can be easily leveraged by anybody. Other advanced capabilities like predictive analytics, scenario analysis, and cognitive analytics—can uncover deeper insights.

## Insights & Actions

Contextual, actionable insights can be made available by embedding Zoho Analytics within business applications or via narrative slide shows and analytics portals. Monitoring key indicators with data alerts can trigger subsequent actions in business workflows.
