12 Lessons ★ 4.5

Create engaging online training

Build multimedia-rich courses that support your learners' styles with a variety of lesson types. Integrate quizzes and assignments into your training program to evaluate learners' understanding of the course materials.

Evaluate learner progress

Get user-specific reports of your courses and quizzes to analyze training effectiveness. Analyze key performance indicators like learner engagement and progress to identify any shortcomings and improve your learning program.

Build extended enterprise portals

Create branded external portals to share resources and deliver training to your partners, customers, and other external stakeholders. Set up public or private access for your portals depending on the audience and type of resources.

Learn allows us to centralize all our processes and policies as well as develop training for onboarding

Scott Rowat,
Founder & CEO, Common Goals Software

Features

- Centralized knowledge base
- Article templates
- In-depth reporting
- Collaborative editor
- Intuitive course builder
- Branding capabilities
- Role-based access
- Quizzes and assignments
- Custom portals
