Custom Authentication

SAML based Custom Authentication enables your users to authenticate themselves with your identity provider.

1. Click "Setup Now".

2. Fill in the fields, with the data provided by your Identity Provider.

3. Test the configuration, by signing in from a new browser.

4. From now on, users can sign-in only through the IdP.

Setup Now

ⓘ Note! Refer our guide to configure ADFS, Azure, G Suite and Okta.

SAML based Custom Authentication enables your users to authenticate themselves with your identity provider.

ACS URL:

https://accounts.zoho.com/signin/samlsp/714277147

Use this value to set up SAML at your IdP

Sign-in URL *

http://

URL to sign in to Zoho account

Sign-out URL

http://

URL to redirect when users sign out.

Change Password URL

http://

URL for your organization users can change their passwords.

Verification Certificate *

Browse

The certificate file must contain the public key for Zoho to verify sign-in request.
